

Remote monitoring of IT Infrastructure

EcoStruxure™ IT Expert from Schneider Electric
Instant visibility to critical infrastructure health

Remote vendor-neutral monitoring with EcoStruxure IT Expert

EcoStruxure IT Expert helps you manage your IT equipment for local edge, distributed IT sites, and Data Center.

IT Expert synthesizes performance and alerts data into proactive recommendations, and enables secure, wherever-you-go visibility and control.

Gain full visibility into the health of your IT infrastructure from anywhere, improve its performance, and mitigate risk with EcoStruxure IT Expert.

Multi-site remote management

Maintain an overview of your entire physical infrastructure – including lights out sites.

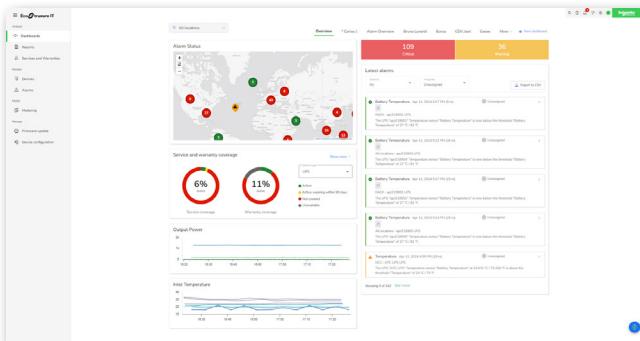

Asset Health Assessment

Optimize your infrastructure by running assessments on your critical assets, including UPS health checks and battery wear with recommended next steps or sustainability metrics to improve inefficiencies through insight into your Power Usage Effectiveness (PUE).

EcoStruxure IT app

Stay connected to your IT infrastructures with live data & alerts on your smartphone.

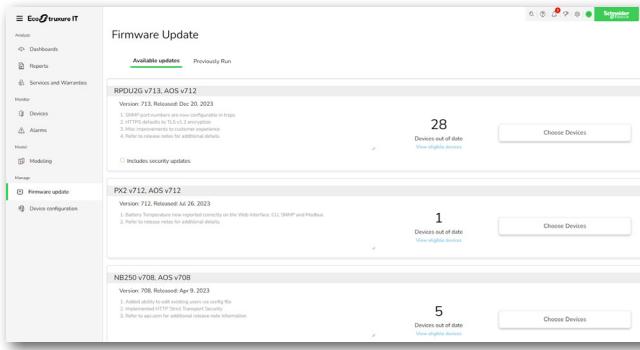

Key functionalities

Alarms & push notifications

Receive alarm notifications in the event of an incident directly on your smartphone with EcoStruxure IT App or by email.

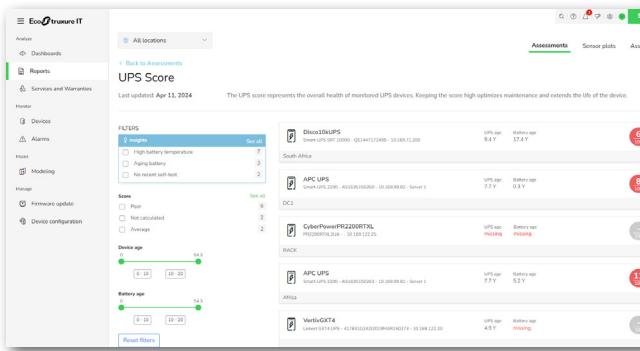

Lower alarm noise by muting specific or all alarms related to a device, from an hour to up to a week.

Modelling

Room and Rack Modelling

Room and rack modeling for physical asset control and space control offering enhanced visibility, planning capabilities, and collaboration among data center management teams.

Monitoring

Customizable dashboards

Design your own dashboard in IT Expert and get an instant overview of the most important information to you. Interested in a specific location or site? You have the ability to drill down and create location-specific dashboards.

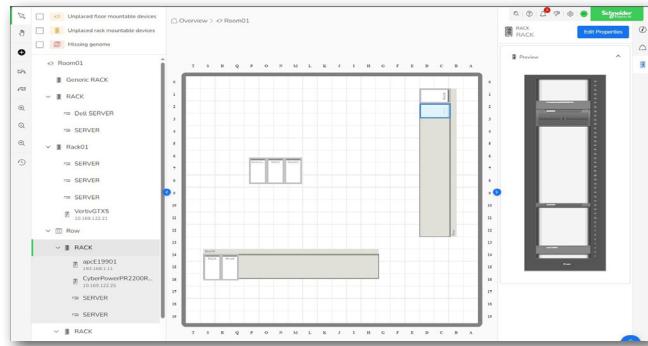

Management

Device Management

Update the firmware on APC devices and easily deploy device settings to a large number of identical devices from anywhere in the world without downtime.

In May 2023 Schneider Electric announced a Secure Network Management Card (NMC) Subscription will be required to upgrade to NMC3 firmware version 3.x (IEC-certified). Customers with IT Expert will not require a Secure NMC Subscription.

Insights

Get insights from AI algorithms on how to optimize your data center operations and reduce risk.

Insights such as health score attributed to your APC UPS and recommendations on how to improve it. Assessments on UPS load and device alarms. Security assessments provides you with visibility into old firmware, outdated hardware, and vulnerable configurations. Sustainability assessment for insight into your PUE and power and cooling consumption.
