TECBOMO®

TECHNOLOGY SOLUTIONS THAT DRIVE INNOVATION

A BUYER'S GUIDE

FOR ALL INDUSTRIES

TECBOMO®

BUYERS GUIDE FOR TECHNOLOGY SOLUTIONS

TECBOMO® The relentless pace of technological innovation demands that businesses and consumers alike navigate a complex landscape of rapidly evolving products and services. In this environment, a comprehensive buyer's guide transforms from mere convenience to an absolute necessity. It serves as a vital compass, directing users through a maze of technical specifications, competing features, and varying price points. By providing clear, unbiased evaluations and comparisons, a well-structured guide empowers individuals to make informed decisions, ensuring that their technology investments align precisely with their needs and objectives. This not only optimizes resource allocation but also fosters a deeper understanding of the technological tools that shape our daily lives.

This buyer's guide extends beyond simple product comparisons. It plays a crucial role in demystifying complex technologies, translating intricate technical jargon into accessible language. This educational function is particularly important in emerging fields like artificial intelligence, blockchain, and augmented reality, where understanding the underlying principles is essential for effective implementation. By offering expert insights and contextual information, a buyer's guide bridges the gap between technological advancement and user comprehension, promoting wider adoption and responsible innovation.

Ultimately, in a market saturated with marketing hype and often misleading claims, a trustworthy buyer's guide acts as a critical safeguard. It establishes a foundation of transparency and accountability, holding manufacturers and service providers to higher standards of product quality and performance. By emphasizing objective testing and real-world evaluations, these guides promote a culture of informed consumerism, where purchasing decisions are driven by genuine value rather than persuasive advertising. This ultimately contributes to a healthier, more sustainable technology ecosystem, where innovation serves the genuine needs of its users.

SIMPLIFYING YOUR IT PROCUREMENT!

We understand that procuring mission-critical technology solutions and assets can be a complex, time-consuming, and often opaque process for organizations. That's why we've dedicated ourselves to simplifying every step, transforming what was once a daunting task into a streamlined, efficient, and transparent experience. Leveraging cutting-edge insights and a deep understanding of market dynamics, TECBOMO empowers businesses to acquire the technology they need, precisely when they need it, with unparalleled ease and confidence, ultimately enabling them to focus on what truly matters, driving their core mission forward.

Meet the Data Intelligence Platform

databricks

Now you can bring AI to your data – so you can deliver AI to the world.

First we reinvented the data platform with the lakehouse. Now we've reinvented lakehouse with generative AI.

Built on a proven lakehouse foundation, the Databricks Data Intelligence Platform combines your data with generative AI so anyone in your organization can securely discover the data they need, generate insights and accelerate AI use cases using natural language.

Your data. Your AI. Your future.

2025 GLOBAL THREAT REPORT

2025 Aerospace and Defense Industry Outlook

The aerospace and defense industry is likely to see broad-based operationalization of an array of technologies

Key trends

2025 Aerospace and Defense Industry Outlook

1 Aerospace and defense companies are identifying opportunities to integrate digital technologies in their maintenance, repair, and overhaul services to realize value.

2 2025 may be a pivotal year in the workforce as digital technologies like AI or gen AI could play an increased role in enhancing traditional talent strategies.

3 The industry is expected to see continued and growing focus on rocket technology, unmanned systems, and space capabilities.

4 Many advanced air mobility manufacturers and operators are setting ambitious targets to launch operations, with frontrunners working to achieve flight certification.

5 Supply chain visibility is likely to be top of mind for the year ahead as parts shortages and delivery delays, shipping costs, and sourcing concerns are likely to continue impacting the industry in 2025.

Dell APEX Multicloud & aaS

The new standard in professional-grade PCs and accessories—striking the perfect balance of performance, sleek design, and rugged durability. Dell Pro is trusted by IT professionals for industry-leading security, effortless manageability, and a strong commitment to sustainability.

The world's broadest AI solutions portfolio* enables you to effortlessly tackle complex workloads with exceptional speed and efficiency. From leading on-device AI innovation that leverages NPU technology to full-day battery life*, you can concentrate on your priorities and achieve more.

Advance sustainability - Dell Pro devices are crafted with sustainability at their core. Utilizing innovative industry-first materials such as bioplastics, reclaimed carbon fiber, and 50% recycled steel, combined with the world's first modular USB-C ports for easy repairs, Dell Pro devices minimize environmental impact while enhancing durability and extending product life.

Government and Public Sector

Public Safety Solutions That Make a Difference

See What's Possible When You Transform Technology

Serving your community has never been more challenging. Rising demand, new threats and constrained resources require equipment made for today's challenges. Let Zebra transform your agency's effectiveness. Our public safety solutions are built to advance your capabilities. You'll gain the reliability of rugged devices that keep you working in even the toughest environments. Smart, intuitive software will minimize training, paperwork and distractions, so you can remain focused on the incident. Count on our industry-leading location technologies to automate the count, location and status of your personnel and essential gear, inventory and assets. From the field to the office, you'll share vital information and make better decisions, thanks to Zebra's real-time guidance and barrier-free communication. That's how you'll optimize your readiness and your response. Through it all, we'll be here to protect and serve you with uncompromising security and smooth, swift integration that alleviates your concerns and IT burdens.

Law Enforcement Technology

Keep officers in the field in the know. In-vehicle mobile workstations and e-citation mobile printing solutions free officers to focus on safety. NG911, FirstNet, and Verizon-compatible solutions connect teams, departments and municipalities.

Firefighter Technology

Get a clearer picture of the environment. Track assets, account for personnel and monitor firefighter vitals. Using industry-leading, location services, track the location and status of equipment and apparatus, while maintaining incident control through a digital fireground accountability system.

Emergency Response Technology

Prepare before you go and respond faster once on scene. Zebra solutions automatically track medication and equipment, accelerate access to ePCR and offer error-free reporting for compliance and better recoveries.

ADOBE DOCUMENT CLOUD FOR GOVERNMENT

Give citizens a faster digital way to sign.
Citizen and community needs keep growing. Stay up to speed by uniting powerful e-signature capabilities with the Adobe tools they already know and trust.

Delight citizens with paperless signatures.

Cut costs while empowering your teams to deliver the fast, mobile-friendly services your citizens need. With Acrobat Sign, it's easy to securely send digital documents for e-signature and track every step of the process from any device, anywhere.

Support any mission.

E-signatures improve efficiencies across all departments in your agency — from mission-critical services like requests for permits, construction planning, or health services to internal operations like human resources, procurement, and IT.

Make it automatic.

Employee-driven and self-serve workflows make it easy to initiate and track signing processes, enforce deadlines, and archive final documents automatically, complete with audit trails.

Get everyone's signature.

Legal e-signatures let you choose from a variety of signer identity verification methods, including US government-issued IDs, certificate-based employee IDs like PIV or CAC cards, and more.

Ensure compliance.

E-signature processes protect sensitive information, ensure legality and accessibility, and enforce regulatory and policy rules automatically — so you can meet requirements for FedRAMP, HIPAA, GDPR, and more.

A total solution for going paperless with e-signatures.
Transform your agency with end-to-end digital document and form processes that make signing and approvals easy and legal.

Get in touch. We're here to help.
Whether you need some basic information about our solutions or would like a customized quote for your unique organization, we're here to answer your questions.

Vertiv launches new AI hub, featuring industry's first AI reference design portfolio for critical digital infrastructure

VERTIV™

Silver
Solutions Provider

Critical Power

Unplanned downtime affects every aspect of business. That's why Vertiv offers reliable and efficient products that work together to safeguard mission-critical networks.

- Uninterruptible Power Supplies (UPS)
- DC Power Systems
- Power Distribution
- Static Transfer Switches
- Switchgear and Switchboard
- Busway and Busduct
- Battery Energy Storage System (BESS)

Thermal Management

High-performance thermal management solutions from Vertiv promise the world's most reliable, sustainable, and cost effective heat management for critical spaces.

- Heat Rejection
- High Density Solutions
- Outdoor Packaged Systems
- Room Cooling
- In-Row Cooling
- Rack Cooling
- Evaporative Free Cooling
- Free Cooling Chillers
- Thermal Control and Monitoring
- Custom Thermal

Racks & Enclosures

Vertiv data center racks, cabinets, and enclosure solutions provide modular support and protection to critical IT and facilities.

- Integrated Solutions
- Racks and Containment
- Outdoor Enclosures

Power and cooling work better, together

Only Vertiv can meet the power and cooling demands of AI workloads. Vertiv 360AI solutions combines power and cooling together with remote management and lifecycle service, providing a complete solution with seamless implementation.

Monitoring, management, and controls software

Vertiv 360AI solutions support network communications and software to provide centralized, remote visibility across the entire solution, with unmatched controls capabilities across power and cooling technologies.

MOTOROLA SOLUTIONS

Hybrid Attacks in the Age of AI: How Cloud-SOC Convergence Is Our Best Defense

Hybrid attacks — those that traverse enterprise and cloud environments with unsettling ease — have become a defining challenge of modern cybersecurity. These attacks are faster, more adaptive, and more complex than anything we've seen before. This isn't a theoretical concern; it's today's reality. To defend against these modern threats, not only products but security operations must evolve.

And within this challenge lies a pivotal opportunity. Artificial intelligence (AI), the very technology that attackers wield to automate and adapt, can become the foundation of a more resilient, responsive defense. The solution lies in unifying cloud and enterprise security operations through AI-driven automation and intelligence. When done by design, security teams gain the clarity and speed to outmaneuver adversaries. This evolution isn't just about defense — it's about empowering innovation and securing the foundations of tomorrow's digital growth.

Meeting the Author ⟶ Karim Temsamani

Your Cybersecurity Strategies Need to Change: How Can AI Play a Role?

Artificial intelligence has become a defining force in reshaping industries, from healthcare to finance to logistics. But perhaps nowhere is AI's transformative potential — and its inherent peril — more apparent than in the field of cybersecurity. It is here that AI has emerged as both a shield and a sword in the silent but unrelenting war against cyber adversaries.

Yet, as organizations rush to embrace AI as the cornerstone of their cybersecurity strategies, a critical question looms: Are we truly ready to harness its power effectively, or are we inadvertently creating vulnerabilities as quickly as we close them? Meet the Author ⟶ Anand Oswal

Intelligence-driven expertise to guide you before, during and after an incident.
Palo Alto Networks
The cybersecurity partner of choice. Contact us today.

Explore Our Solutions

Helping your business solve challenges and unlock opportunities through end-to-end technology solutions.
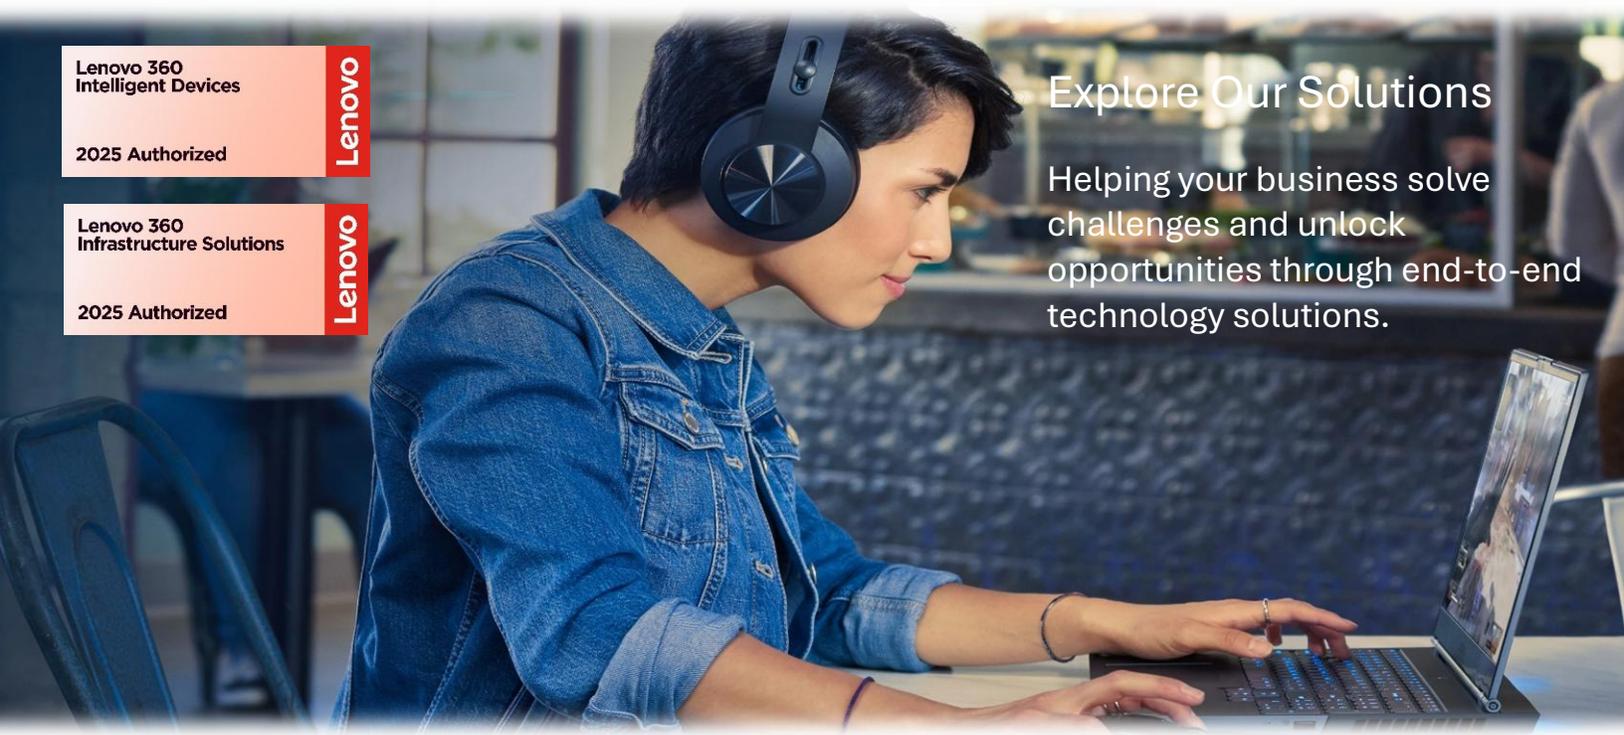

AI & Edge: Lenovo brings AI to your data where and when you need it the most – from the edge to the cloud. We have the expertise and services to help our customers envision, build, and manage their AI and edge solutions.

Digital Workplace: Empower your teams for productive hybrid work with complete digital workplace solutions designed for business-class stability and reliability.

Hybrid Cloud: Meet evolving market challenges with comprehensive hybrid cloud and business continuity solutions that optimize workloads and improve efficiency.
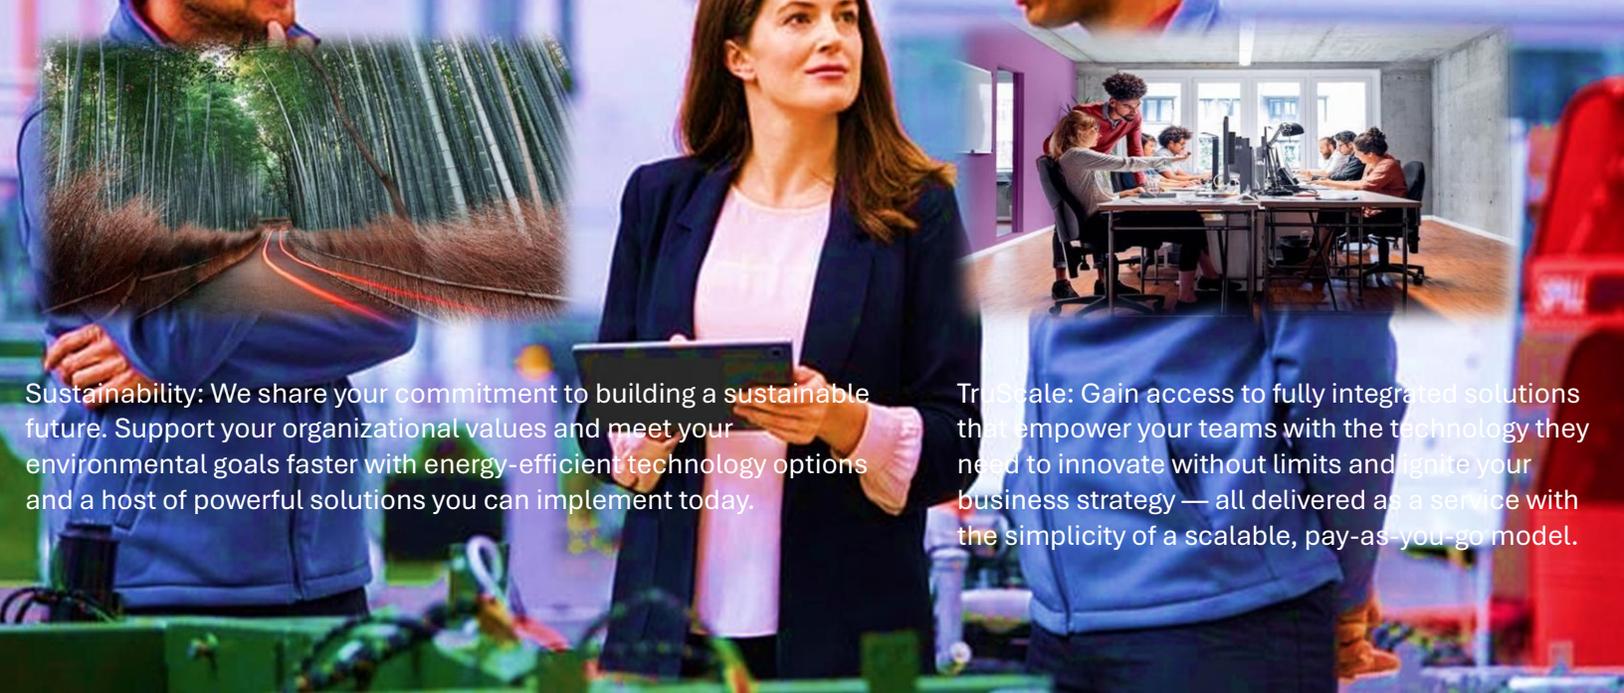

Sustainability: We share your commitment to building a sustainable future. Support your organizational values and meet your environmental goals faster with energy-efficient technology options and a host of powerful solutions you can implement today.

TruScale: Gain access to fully integrated solutions that empower your teams with the technology they need to innovate without limits and ignite your business strategy — all delivered as a service with the simplicity of a scalable, pay-as-you-go model.

The Wall
Make a bold statement, faster

The Wall All-in-One delivers the ultimate viewing experience of the box.

SAMSUNG
PARTNER SOLUTIONS

Pure perfection on a deeper level

Black Seal Technology
A deep black background blankets the screen with accurate uniformity, creating a seamless canvas for purer black levels. The enhanced depth delivers unparalleled contrast and immaculate detail.

Instant AI optimization

Neural Quantum Processor 4K
Every second of content is instantly analyzed and optimized for perfect picture quality. The powerful AI processor delivers superior visuals in any size up to 4K resolution, enhancing contrast and removing noise.

Liebert® PST5

The Vertiv™ Liebert® PST5 standby UPS family offers guaranteed battery backup and surge protection for computers, gaming consoles, workstations, retail point-of-sale (POS) equipment, wireless networks, surveillance systems and other electronics. Offered with a standard 3-year warranty, the Liebert PST5 is the perfect choice for electronics that need reliable and economical power protection.

Liebert® PSI5 TAA / 1,500 - 3,000VA

The Vertiv™ Liebert® PSI5 TAA-compliant line interactive UPS system with Automatic Voltage Regulation (AVR) is designed for IT applications such as network closets and small data centers. This product is TAA-compliant and for government use.

Vertiv™ Liebert® ITA2 -3 Phase UPS

The Liebert® ITA2 UPS offers economical, efficient and reliable three-phase power for critical loads under 10kVA. Use in a rackmount or tower configuration. This intelligent UPS has scalable battery runtimes, output distribution options, a high power factor and an optional maintenance bypass cabinet. It is easy to install and operate. Optional lithium-ion battery cabinets available.
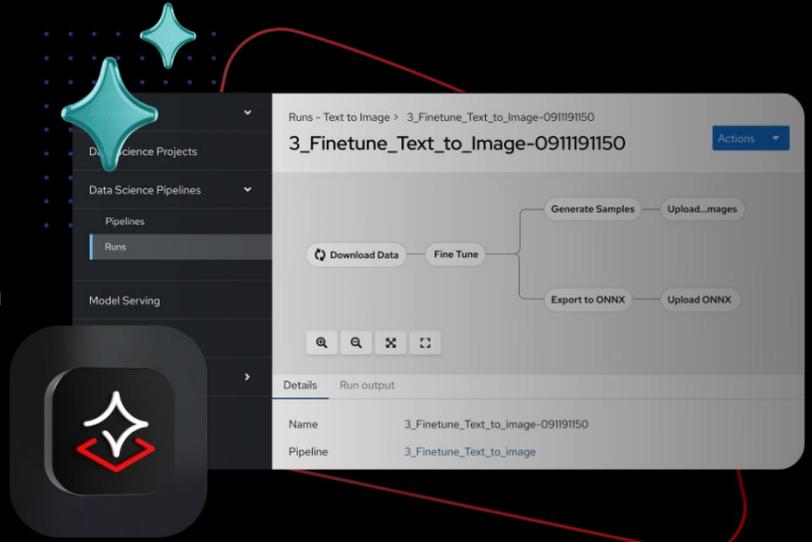

Red Hat AI

Build AI for your world
Deliver AI value with the resources you have, the insights you own, and the freedom you need.

Red Hat AI is engineered to help you build and run AI solutions that work exactly how your business does—from first experiments to full production.

Build your skills through hands-on product experience

Explore no-cost product trials or pay-as-you-go options to find the right Red Hat® solutions for your organization.

Red Hat AI
Tune small models with enterprise-relevant data and develop and deploy AI solutions across hybrid cloud environments.

Red Hat Enterprise Linux
Support application deployments—from on premise to the cloud to the edge—in a flexible operating environment.

Red Hat OpenShift
Quickly build and deploy applications at scale, while you modernize the ones you already have.

Red Hat Ansible Automation Platform
Create, manage, and dynamically scale automation across your entire enterprise.

Building enterprise-ready solutions with open source

We believe using an open development model helps create more secure, stable, and innovative technologies. By collaborating with open source communities, we're developing software that pushes the boundaries of technological ability.

TECBOMO

Asset Recovery Services

Plan your refresh in advance with secure and responsible IT asset retirement and seamlessly transition from old to new technology while protecting your business and addressing your sustainability goals.

Leverage our robust suite of services for retiring your IT equipment

RESALE and RECYCLE
Find out what your equipment is worth and cash in quickly to help your business grow. If there's no value, we recycle all devices in compliance with local regulatory guidelines. We handle every detail, from pick-up to final reporting, including offsite data sanitization.

LEASE RETURN
Don't get caught in a bind when you reach the end of your equipment lease or APEX PCaaS subscription. We can help you transport your used assets, regardless of brand, back to the company from which they were leased. We can also perform data sanitization as an add-on service.

DATA SECURITY ADD-ONS
For those that require an extra level of protection, we offer flexible sanitization options to fit your needs, including onsite data sanitization, as well as onsite hard-drive shred. Devices are sanitized in alignment with NIST SP 800-88 r1 standard.

How Asset Recovery works

RETURN ANY BRAND
We accept any brand of owned or leased* client products and servers

RELY ON END-TO-END LOGISTICS
We handle every detail from pick up to final reporting

SECURE YOUR DATA
Devices are sanitized in strict alignment with the NIST SP 800-88 r1 standard

GET MONEY BACK
We maximize reuse so you can reinvest value from aging equipment

OR RECYCLE
If there's no value, we recycle all devices in compliance with regulatory guidelines

A Circular Economy: Advancing Sustainability by Minimizing Waste We are committed to designing solutions and products that can help us reduce our overall environmental impact – for ourselves and our customers – as we all work toward net zero goals. Adopting a circular strategy by reusing products, parts and materials helps us decrease reliance on new materials, easing the pressure off our environment

Asset Recovery Services provides you with a seamless and secure way to responsibly retire legacy client equipment of any brand, while addressing your own sustainability goals. And with our Environmental Impact Report feature, we've made it easier for you to measure your efforts against your sustainability strategy.

Beyond Automation: The Era of Agentic AI

Agentic AI represents a significant leap beyond traditional AI, moving from passive responders to proactive problem-solvers. These systems possess the ability to perceive their environment, reason for it, and take autonomous actions to achieve specific goals. This autonomy allows them to operate with minimal human intervention, making them ideal for dynamic and complex situations where real-time decision-making is crucial.

The core of Agentic AI lies in its ability to learn and adapt. Unlike static AI models, agentic systems continuously analyze new data, refine their strategies, and improve their performance over time. This adaptability is achieved through a combination of technologies like machine learning, deep learning, and reinforcement learning, enabling them to handle uncertainty and optimize their behavior in evolving environments.

One of the key characteristics of Agentic AI is its goal-oriented nature. These systems are designed with specific objectives in mind, whether they're optimizing a supply chain, managing a financial portfolio, or providing personalized customer service. They use their understanding of the environment and their learned experiences to formulate plans and execute actions that drive them closer to these goals.

The potential applications of Agentic AI are vast and transformative. From automating complex workflows in industries like manufacturing and logistics to enabling more personalized and responsive customer interactions, these systems are poised to revolutionize the way we live and work. As Agentic AI continues to evolve, it promises to unlock new levels of efficiency, productivity, and innovation across various sectors.

However, the rise of Agentic AI also brings forth important considerations. Ensuring these systems are aligned with human values, addressing potential ethical concerns, and establishing clear guidelines for their development and deployment are crucial steps. By carefully navigating these challenges, we can harness the full potential of Agentic AI while mitigating its risks, paving the way for a future where humans and AI agents work collaboratively to solve some of the world's most pressing problems.

Kensington®

Data breaches aren't just a digital problem—every stolen or unsecured device represents a potential gateway for unauthorized access to sensitive information, posing significant risks for organizations. With the financial burden of a data breach now averaging millions of dollars, the stakes have never been higher.

TECBOMO

Introducing Kensington EQ

The Kensington EQ line represents a commitment to reducing our environmental impact without compromising on quality and performance.

Creating durable products that inspire customer confidence, Kensington's EQ range is designed using more sustainable materials, empowering you to make more informed choices.

EQ Series Products

Our EQ products incorporate materials such as recycled water bottles and aluminum while reducing the use of virgin plastic. Our pledge to transparency ensures you know the recycled content of every EQ product. With multiple checkpoints, and our meticulous design team, Kensington EQ redefines what it means to be a forward-thinking brand.

Advanced Detection and Protection

Skyhigh DLP helps organizations protect their sensitive and confidential data using multiple advanced content-matching techniques, including real time Exact Data Matching (EDM), Indexed Document Matching (IDM), Optical Character Recognition (OCR) and AI-ML Auto Classifiers. These techniques increase accuracy, efficiency, and compliance within a wide range of industries and contexts - enabling organizations to better detect sensitive data, enforce policies, and prevent data leakage. They also tackle emerging threats such as ransomware, extortion, and identify insider threats.

Exact Data Matching (EDM)

Skyhigh's highly scalable EDM detects personally identifiable information (PII) and other confidential data stored in structured repositories with a very high detection accuracy and low false positive rates. EDM removes the manual burden on DLP administrators, reduces false positives and improves the overall security posture while providing the highest level of adherence to compliance requirements.

Indexed Document Matching (IDM)

Skyhigh's enhanced IDM protects unstructured data in text-based documents and image files through fingerprinting and indexing. Once your data is fingerprinted, you can add a DLP policy rule to leverage that indexed data for a complete or percentage match to protect your most sensitive documents. IDM complements exact data matching techniques to further reduce false positives by using exact hashes and taking away the guesswork out of a policy.

Optical Character Recognition (OCR)

OCR technology protects data that is stored in digital format, such as images of drivers licenses, passports or tax documents. OCR isa text extraction process that pulls text out of documents and images and feeds the plain text into the DLP engine for scanning to take place. OCR prevents data loss, misuse and theft by scanning images for sensitive information.

Skyhigh AI

Skyhigh AI provides best in breed AI-powered SSE solutions to safeguard your data, prevent threats, and ensure compliance, while enabling your organization to embrace AI to foster innovation securely and efficiently.

Empowering government cybersecurity leaders on the path of agility and resilience with five key actions.

By 2025, 75% of government CIOs will be directly responsible for security outside of IT, including operational and mission-critical technology environments.

A new level of security risk is generated by legacy systems. digital transformation initiatives, cyber-physical systems (CPS), and now AI. In addition, nation-states, hacktivists, and ransomware gangs target government systems. Government agencies must implement new cybersecurity tactics to understand the key stages, resources, and people that are required to plan and execute an effective cybersecurity initiative.

Increase Resilience and Reduce Risks with Adaptive Cybersecurity

What are the key stages? This best-practice insight is distilled from interactions with clients who have successfully implemented cybersecurity initiatives. This map shows the sequence of objectives and desired outcomes and is useful for aligning all stakeholders. A few key milestones and a sample of associated Gartner resources are highlighted below, but the full roadmap will include complete details of all milestones and resources for each stage

Top questions for a government cybersecurity initiative

1 How will this support mission resilience and public service goals while reducing risk?

2 How can we use a risk-based and outcome-driven approach to establish cybersecurity priorities and investments?

3 Which leaders and teams need to be involved?

Roadmap for Government Cybersecurity Leaders covers five key actions:
- Align strategy that sets objectives and builds a business case.
- Develop an action plan to create a risk prioritization framework.
- Initiate execution to build a design and adjust the team structure.
- Build and mature program that maintains accountability and assurance.
- Reassess and optimize to demonstrate and communicate value.

Align strategy	Develop an Action plan	Initiate execution	Develop an Action plan	Build a mature program

Gartner®

Chief information security officers (CISOs) can help by developing processes that enable risk-based decisions, while protecting against security threats, and preventing data breaches and other cybersecurity events. From our expert research and interactions with thousands of companies across industries, we have compiled cybersecurity best practices into a customizable roadmap that also recognizes unique public-sector mandates. Use it to understand the key stages, resources and people required to plan and execute an effective cybersecurity initiative

GitLab Duo Self-Hosted

Accelerate Development While Addressing Privacy

Today's enterprises, particularly those in regulated industries such as financial services, public sector and healthcare face critical challenges in AI adoption. While they need to leverage AI to stay competitive, the complexity of regulatory requirements and data privacy concerns often prevents organizations from using cloud-based AI services. Technology teams struggle to select production ready AI models that balance computational efficiency with enterprise-grade performance while meeting strict security standards. This challenge is compounded by the tension between development teams eager to adopt AI tools and security teams requiring granular control over data flows and processing, particularly in industries where every data interaction must be traceable and controllable.

Talk to an Expert
Want to see a custom demo or get help finding the right plan?

We'd love to chat. ⟶

Get started on AI-powered development while addressing security and compliance. Reach out to us to set up GitLab Duo Self-Hosted in your environment today.

Click here

🦊 GitLab

Adopt AI while addressing data privacy

GitLab Duo is the end-to-end AI solution for fast, secure software development. It eliminates friction while helping to empower teams to strengthen their development process - from building secure applications to streamlining software pipelines, ultimately assisting with enhancing developer productivity and product quality.

With GitLab Duo Self-Hosted, you can deploy GitLab Duo within your own infrastructure to help ensure data privacy. An optional capability for self-managed customers with a GitLab Duo Enterprise subscription, GitLab Duo Self-Hosted supports deployment flexibility across multiple platforms, including on-premises infrastructure, or in private clouds and secure clouds environments through AWS Bedrock and Azure OpenAI. This enables organizations to leverage AI capabilities while helping them adhere to their specific infrastructure and security requirements.

🔒 **Data Privacy and Control**
Deploy AI-powered development capabilities across the entire development lifecycle while helping to keep all data within your organization's infrastructure boundaries.

✦ **Supported AI models**
Access GitLab-supported language models (including Mistral, Claude, and GPT model families) that are compatible with enterprise deployments.

🛡 **Secure Development at Scale**
Enable development teams to leverage AI capabilities while providing security teams with comprehensive controls over deployment environments.

`</>` **Scalable and flexible**
Adjust workload demands with control over infrastructure resources and data processing locations.

Meet the Xerox B230 Printer and Xerox B225/B235 Multifunction Printer

TECBOMO

xerox
Solution Provider

At Xerox, they understand that small businesses and remote workers have big needs. With work environments changing radically, people need versatile devices that prioritize ease of use and enhanced productivity. Simplify the way you work with the Xerox B230 Printer and B225/B235 Multifunction Printer. Ideal for remote workspaces, home offices, and small- to medium-sized businesses, these printers are incredibly easy to set up. They are compact enough to suit small teams and tight spaces while offering you a hassle-free printing

Reliable, efficient printers that are perfect for your small business or home office.

A SPEEDY SETUP. WITHOUT T HE HASSLE.
The Xerox® Easy Assist app simplifies installation, monitoring and management of your printer or MFP right from your mobile phone. It provides easy access to self-support services and real-time monitoring of printer performance. And, Xerox Smart Start Software takes the guess work out of setup by automating the installation of the latest software for your printer or MFP on your computer – all without IT support – allowing you to be up and running quickly.

YOUR S ILENT STAR PERFORMER
A distraction-free workspace is within your reach. With quiet printers that do more, get high quality prints at speeds that match your pace. Scan, print, and copy with minimal interruptions.

QUICK PRINTING AT YOUR FINGERTIPS
Discover true mobility with secure, wireless printing. With built-in Wi-Fi connectivity and features like Apple AirPrint, Mopria Print Service and Mopria Scan, and Wi-Fi Direct, you can print with ease from mobile devices, laptops, tablets, Chromebooks, or desktops.

PRODUC TIVIT Y IN A SINGL E C L ICK
Time is on your side with Xerox® Print Drivers and the Xerox Print and Scan Experience App. Get quick access to printer
functionality and presets from your laptop or desktop – all with a single click.
Make scanning a breeze with features like auto-straightening, auto-cropping images, and receipt scanning.

REFRESHINGLY S IMPLE . REASSURINGLY SECURE .
Keep your businesses safe from increasingly
sophisticated cyber threats. Advanced security features help safeguard access while protecting your sensitive data and documents

LOW RUNNING COSTS WITH MINIMAL ENVIRONMENTAL IMPAC T
Keep the focus on getting your work done with a dependable, low maintenance, and cost-effective printer. High-yield cartridges ensure lower running costs, while our **Green World Alliance** recycling program helps you reduce your impact on the environment.

BOSCH

TECBOMO

The dawn of Monday, April 28, 2025, breaks with an electrifying synergy at the intersection of artificial

TECBOMO

intelligence and video analytics. TECBOMO, a rising force in innovative technology solutions, announces a groundbreaking partnership with the esteemed Bosch, a global leader in security and safety systems. This collaboration signifies a pivotal moment, poised to redefine how organizations leverage the power of visual data. By integrating Bosch's robust hardware and sophisticated software with TECBOMO's cutting-edge AI algorithms, this alliance is set to unlock unprecedented levels of proactive security and operational efficiency.

At the heart of this transformative partnership lies the promise of "predictive-ready" video systems. This isn't just about capturing and storing footage; it's about intelligent interpretation and foresight. Imagine security systems that can not only detect anomalies in real-time but also anticipate potential risks before they escalate. Envision operational analytics that move beyond historical data to forecast trends, optimize resource allocation, and enhance overall productivity. The fusion of TECBOMO's AI prowess with Bosch's established reliability creates a powerful engine for proactive decision-making across diverse industries, from smart cities and critical infrastructure to retail and manufacturing.

This strategic alliance between TECBOMO and Bosch on this significant Monday heralds a new era where video analytics transcends traditional surveillance. It embodies a shift towards intelligent vision – systems that learn, adapt, and provide actionable insights. As businesses and communities increasingly seek smarter, more efficient ways to ensure safety and optimize operations, this partnership stands as a beacon of innovation, promising a future where the power of predictive-ready video systems becomes an indispensable asset in navigating an increasingly complex world. Learn More. ⟶

Safety and security solutions

Protecting lives, buildings, and assets is our aim. Our product portfolio includes video surveillance, intrusion detection, fire detection, and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound, and music complete the range.

The move to predictive

Bosch is innovating at the speed of AI – leading the transition to predictive video security solutions with visual intelligence. Think AI-enabled cameras and cloud services that extract metadata from your video footage, turning them into valuable insights and supporting informed decision-making.

No unwanted alarms. No guesswork. Bosch's AI-enabled solutions can find meaningful information in video footage in real-time, recognize patterns, and ultimately help predict what will happen next. So, it's never been easier to identify and respond to potential risks and unwanted threats. Or improve the safety, security, and operational efficiency of your environment. Simplify Your AI Journey
Deliver AI at scale across cloud, data center, edge, and client—that's the power of Intel Inside

Reduce Complexity. Level Up Productivity
Accelerate and Scale AI with Intel® Tiber™ AI Cloud
Access Intel's latest hardware and software to build, optimize, and deploy AI models and applications. Run small and large-scale AI training and inference workloads and deploy with optimized price performance. Maximize performance using small to large VMs, powerful multiplatform systems, and clusters.

Industry Solutions

Finance. Mitigate Financial Risk and Fraud
Mitigate risk by installing AI models that continuously enhance customer predictions or financial markets using historical and real-time data. Minimize financial losses by uncovering emerging patterns to prevent fraud.

Healthcare Pharma. Make Precision Medicine a Reality
Use data science to accelerate the production of personalized medicines and reduce clinical trial costs. Increase the accuracy of diagnostics, apply machine learning to predict patient outcomes, and train machines to recognize and measure symptoms.
Insurance. Personalize Insurance

Use data science to mitigate risk with more accurate claims prediction and fraud assessment. Personalize insurance offers, policies, pricing, and recommendations with natural language processing models that help you produce content.

Manufacturing. Make Manufacturing Smarter
Use advanced AI and deep reinforcement learning algorithms in production for full monitoring and performance tracking capabilities to solve even the most complex business problems. Give your data scientists an open-source library to design, build, and train deep learning models for better manufacturing

Aerospace and Defense. Fortify Aerospace and Defense
Put machine learning at the front lines of defense with optimal intelligence. Build ML models to improve intelligence and predictions, computer vision for heightened surveillance, and ML applications for state-of-the-art technology.

TECBOMO

Empowering Access Everywhere

Every day, millions of people in more than 100 countries use HID products and services to securely access physical and digital places. Billions of things that need to be identified, verified and tracked are connected through our technology.

Access Control & Identity Management Solutions

We're HID — a leading provider of access control, RFID and digital security solutions that make it possible for people to transact safely, work productively and travel freely.

Access Control	Biometrics	Card Printing	Digital Security	RFID

Identity & Access Management	Digital Security

Ensure Safe, Seamless Access to Your Facilities & Systems

Manage access to physical spaces, networks and services using physical keycards or digital credentials.

Access Control Systems
Safe and convenient access control systems

Cloud-Based Physical Access Control
Build integrated access control solutions through the cloud

Contactless Payments and Ticketing
Efficient, intuitive and secure

Mobile Access Solutions
Use mobile to access networks, spaces and services

Physical Identity & Access Management
Centralized, integrated physical access and IT systems

Touchless Access Control
Touchless access for a safer workplace

Visitor Management
Extend identity management beyond visitors

Use Case: TECBOMO™ and Maryland Health Benefit Exchange (MHBE) - Enhancing Healthcare Access and Efficiency through Databricks

Context: The Maryland Health Benefit Exchange (MHBE) operates Maryland Health Connection, the state's health insurance marketplace established under the Affordable Care Act. MHBE's mission is to improve the health and well-being of Marylanders by connecting them with quality, affordable health coverage through innovative technology and consumer assistance. They handle vast amounts of data related to enrollment, eligibility, plan selection, and user interactions.

Challenge: MHBE faces the ongoing challenge of efficiently managing and analyzing its complex and growing datasets to:

- Improve Enrollment Processes: Streamline the application and enrollment experience for Maryland residents.
- Enhance Customer Support: Provide personalized and timely assistance to users navigating the marketplace.
- Optimize Plan Management: Effectively manage and analyze the performance of various health insurance plans offered.
- Ensure Regulatory Compliance: Meet stringent state and federal reporting requirements.
- Detect and Prevent Fraud: Identify and mitigate potential instances of fraud and abuse.
- Gain Insights for Policy Decisions: Extract meaningful insights from data to inform policy adjustments and improve the overall effectiveness of the exchange.

Solution: TECBOMO's Databricks Implementation for MHBE

TECBOMO™, a technology solutions provider with expertise in the healthcare sector and data analytics, partnered with MHBE to implement a comprehensive Databricks solution tailored to their specific needs. This solution leveraged the key capabilities of the Databricks Lakehouse Platform, unifying data warehousing and advanced analytics with AI and machine learning.

Deliver an Unparalleled User Experience and Simplify Operations with Juniper and Mist

Users expect a great wireless experience. Yet many organizations are stuck with legacy wireless LANs that simply can't deliver the performance, scalability, and simplicity that's needed to meet the demands of today's mobile, cloud, and IoT world.

As a Juniper customer, you know the operational simplicity and unparalleled performance and reliability of Juniper switching solutions. Now, by adding the Mist wireless LAN platform, you can extend that experience to users of mobile and IoT devices, delivering on the promise of an AI-driven network from edge to core.

By applying the power of the AI-powered Mist Cloud across the enterprise network, Juniper is a force multiplier for the AI-driven enterprise, simplifying how enterprises deliver an amazing digital experience.

1. Ensure an unparalleled user experience.

Mist is a wireless LAN platform built for today's mobile, IoT, and cloud world. While other WLAN products were designed long before smartphones, cloud, and AI, the Mist platform is built on a modern microservices cloud architecture that combines AI, machine learning, and data science with the latest cloud technologies, delivering an unparalleled user experience.

Mist leads the convergence of Wi-Fi, Bluetooth Low Energy (BLE), and IoT with enterprise-grade access points. APs handle data collection, analysis, and policy enforcement, along with machine learning, location services, and event correlation. APs also support the newest Wi-Fi 6 (802.11ax) technology for environments with soaring densities of mobile and IoT devices as well as Wi-Fi 5 (802.11ac).

2. Simplify network operations with automation.

Wireless networks are more critical to business operations than ever, yet increasingly difficult to troubleshoot. When problems take too long to solve, business is disrupted. But automation and AI can deliver operational simplicity and a more resilient network. Marvis, the Mist AI-driven virtual network assistant, brings to life a "driver assist" mode for your enterprise network, simplifying troubleshooting and network performance analysis.

Ask questions and get intuitive answers on par with a wireless expert that lets your IT team spend less time on network configuration, operations, and troubleshooting, and more time on strategic projects.

With Mist Wired Assurance, Juniper Networks® EX Series Ethernet Switches continuously deliver network telemetry to the Mist Cloud. Data is analyzed to create unprecedented visibility into wired service levels, giving IT a clear view into the health of Juniper switches, while Marvis proactively detects problems before network services are negatively impacted.

3. Reimagine your IT operations model with AI.

IT transformation is complex, and the old, reactive way of manually operating IT infrastructure can't keep pace with today's speed and scale. With Juniper, you can apply predictive, AI-driven operations to efficiently meet escalating service levels and business needs. Instead of manual actions, Juniper employs programmatic tools, open interfaces, and data insights to drive operations from users and devices in your campus and branch locations across the wider enterprise.

Join Us for the New Era of IT

AI-driven IT operations is a journey. With a Juniper network, you can migrate your enterprise framework to an automated, software-defined multicloud at your own pace—and under your own control.

To learn more about deploying the Mist WLAN platform with your Juniper wired network, please visit www.juniper.net/us/en/products-services/wireless/mist/.

What the Analysts Are Saying

- Gartner named Mist a Visionary in Magic Quadrants for Wired & Wireless LAN.[1]

- Gartner named Mist a Visionary in the Magic Quadrant for Indoor Location Services.[ii]

- Gartner named Juniper a Leader in the 2019 Magic Quadrant for Data Center Networking.[iii]

1 Gartner Magic Quadrant for the Wired and Wireless LAN Access Infrastructure, Bill Menezes, Christian Canales, Tim Zimmerman, Mike Toussaint, 24 September 2019.

ii Gartner Magic Quadrant for Indoor Location Services, Global, Tim Zimmerman and Annette Zimmermann, 28 January 2019.

iii Gartner Magic Quadrant for Data Center Networking, Andrew Lerner, Mike Toussaint, Jonathan Forest, 15 July 2019.

TECBOMO: Empowering the EV Charging Community as an Authorized Blink Reseller

TECBOMO is proud to be an authorized reseller of Blink EV charging solutions, a leading provider of electric vehicle charging equipment and services. This partnership allows TECBOMO to deliver advanced and reliable EV charging infrastructure to businesses, organizations, and residential communities, directly contributing to the growth and accessibility of electric vehicle adoption. By offering Blink's comprehensive range of Level 2 and DC fast charging stations, TECBOMO helps to establish robust charging networks, ensuring that EV drivers have convenient and dependable access to power wherever they go. Our commitment extends beyond just sales; we provide expertise in site assessment, installation, and ongoing support, making the transition to electric mobility seamless for our clients.

Dual-Port.

The Series 7

80 Amp Fleet & Multiunit EV Charging

blink

With its compact form factor, easy installation, commercial-grade aluminum body, and ENERGY STAR® certification, the Series 7 charging station is the perfect solution for your business or fleet.

COMPACT • DUAL-PORT • POWERFUL

Series 7 Benefits

- Communicates with the cloud via built-in 4G LTE signal
- Rugged aluminum enclosure prevents environmental damage
- Bright LED status indicator lights
- Backlit LCD Screen
- Network connectivity with robust electricity management
- Universal J1772 plugs, charges all electric or plug-in hybrid electric vehicles*
- Convenient access panel makes installation troubleshooting, and connectivity a breeze
- API Integration creates a 360-degree view of your operations and provide dependable charging experiences
- Robust remote management tool via Blink Fleet portal and Blink Network**

Product Details

AC Power Output, Maximum (Per Port)	7.2 kW (30A@240VAC), 11.52 kW (48A@240VAC), 19.2kW (80A@240VAC)	Safety & EMI Compliance	UL 2231-1, 2231-2, UL 2594, NEC Article 625, FCC Part 15 Class A

BLACKBIRD.AI

NARRATIVEPULSE: KICKSTART YOUR NARRATIVE INTELLIGENCE JOURNEY

Gain insight into the harmful narratives impacting your organization with automated narrative discovery and risk assessment.

THE PERFECT STARTING POINT FOR NARRATIVE INTELLIGENCE

Blackbird.AI's **NarrativePULSE** is an intuitive, AI-powered product designed to help organizations identify prominent narratives and risk signals in the current online environment including social media, dark web, news media, and web content. By surfacing and prioritizing high-risk narratives, **NarrativePULSE** enables organizations to gain context and insight into the threat actors, and risks associated with these attacks that can cause financial, reputational and operational harm.

Built as a turnkey solution, **NarrativePULSE** provides rapid, actionable intelligence for companies looking for a high-value, low-friction introduction to narrative intelligence. Blackbird.AI's Constellation platform is available as an upgrade for those looking to conduct deeper investigations into narratives over time or conduct advanced media forensics.

NarrativePULSE empowers you to make better strategic decisions by understanding the most important narratives affecting the organization at the moment. Your custom dashboard view rapidly surfaces critical signals including prioritizing the most harmful narratives impacting your organization, manipulation detection, anomalous activity, and key influencers and cohorts engaged, all in an easy-to-view narrative scorecard.

OVERVIEW

NarrativePULSE is a streamlined intelligence product within the Blackbird.AI ecosystem. It automates and simplifies narrative discovery by analyzing thousands of sources—including social media, dark web, news media, and web content—to surface harmful narratives which may pose reputational, financial, or security risks.

Using Blackbird's Constellation Risk Signals combined with Generative AI, **NarrativePULSE** delivers clear, concise, and actionable narrative intelligence in a simple, easy-to-navigate dashboard well suited for busy leadership and operational teams. It identifies and summarizes high-risk narratives and ranks them by priority based on hundreds of risk signals to help you make better strategic decisions, especially during times of crisis.

A Symphony of Expertise

We firmly believe that the sum is greater than its parts. By partnering with the world's leading technology manufacturers, we gain access to a wealth of expertise and resources that would be beyond the reach of a single entity. This collaborative approach allows us to:

Deliver Cutting-Edge Solutions: Our partnerships grant us access to the latest technologies as soon as they hit the market. This enables us to integrate these advancements seamlessly into our solutions, ensuring our clients remain at the forefront of innovation.

Unparalleled Depth of Knowledge: Each technology manufacturer possesses an in-depth understanding of their specific solutions. By partnering with them, we tap into this vast pool of knowledge, allowing us to provide our clients with comprehensive advice and support.

Enhanced Scalability and Flexibility: Our partnerships empower us to offer a wider range of solutions, catering to diverse client needs and industry demands. Additionally, these alliances enhance our ability to scale our services efficiently, ensuring we can seamlessly support organizations of all sizes.

THE BEST OF HONEYWELL BW™ IN THREE PORTABLE COMPLIANCE DETECTORS

From pioneering a fixed-life single-gas detector to launching the first compact multi-gas detector with one-button operation, Honeywell BW™ has set the standard for quality, reliability and ease of use in portable gas detection.

The BW Next Generation Multi-Gas Platform combines the best features of our legacy portable gas detectors with the latest technology and capabilities. Workers can continue to get the Honeywell BW™ experience and performance they expect in addition to new features which make it even easier to increase multi-gas safety and compliance.

Continuing the legacy of Honeywell BW™ products, the Icon and Flex portable detectors are engineered for simple operation and straightforward notification, including bright lights, vibration and a 95-decibel alarm. If there's a gas threat, workers will know it.

A NEW STANDARD OF SIMPLICITY AND RELIABILITY IN MULTI-GAS DETECTION

Honeywell BW™ Icon and BW™ Flex

Honeywell

Honeywell BW™ Icon
Fixed-life, 2-year, 4-gas detector for the hazards workers face most often

Honeywell BW™ Icon+
Serviceable 4-gas detector with a choice of 5 sensors

Honeywell BW™ Flex
Serviceable 4-gas detector with a choice of more than 15 sensors

Policies, Frameworks and Executive Orders

Executive Order 14110

Advancing Governance, Innovation, and Risk Management for Agency Use of Artificial Intelligence

Artificial intelligence (AI) is one of the most powerful technologies of our time, and the President has been clear that we must seize the opportunities AI presents while managing its risks. Consistent with the AI in Government Act of 2020,1 the Advancing American AI Act,2 and Executive Order 14110 on the Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence, this memorandum directs agencies to advance AI governance and innovation while managing risks from the use of AI in the Federal Government, particularly those affecting the rights and safety of the public.

4.(b.) Removing Barriers to the Responsible Use of AI
Embracing innovation requires removing unnecessary and unhelpful barriers to the use of AI while retaining and strengthening the guardrails that ensure its responsible use.

4.(b.) (i) IT Infrastructure. Agencies should ensure that their AI projects have access to adequate IT infrastructure, including high-performance computing infrastructure specialized for AI training and inference, where necessary.

4.(b.) (ii) Data. Agencies should develop adequate infrastructure and capacity to sufficiently share, curate, and govern agency data for use in training, testing, and operating AI. This includes an agency's capacity to maximize appropriate access to and sharing of both internally held data and agency data managed by third parties.

4.(b.) (iii) Cybersecurity. Agencies should update, as necessary, processes for information system authorization and continuous monitoring to better address the needs of AI applications, including to advance the use of continuous authorizations for AI. Consistent with Section 10.1(f) of Executive Order 14110, agency authorizing officials are encouraged to prioritize review of generative AI and other critical and emerging technologies in Authorizations to Operate and any other applicable release or oversight processes.

4.(b.) (iv) Generative AI. In addition to following the guidance provided in Section 10.1(f) of Executive Order 14110, agencies should assess potential beneficial uses of generative AI in their missions and establish adequate safeguards and oversight mechanisms that allow generative AI to be used in the agency without posing undue risk.

Cybersecurity Frameworks

The NIST Cybersecurity Framework (CSF) 2.0 provides guidance to industry, government agencies, and other organizations to manage cybersecurity risks. It offers a taxonomy of high-level cybersecurity outcomes that can be used by any organization — regardless of its size, sector, or maturity — to better understand, assess, prioritize, and communicate its cybersecurity efforts. The CSF does not prescribe how outcomes should be achieved. National Institute of Standards and Technology This publication is available free of charge from: https://doi.org/10.6028/NIST.CSWP.29

Artificial Intelligence Risk Management Framework (AI RMF 1.0)

Framing Risk AI risk management offers a path to minimize potential negative impacts of AI systems, such as threats to civil liberties and rights, while also providing opportunities to maximize positive impacts. Addressing, documenting, and managing AI risks and potential negative impacts effectively can lead to more trustworthy AI systems. Learn More. https://www.nist.gov/itl/ai-risk-management-framework

Cybersecurity Maturity Model Certification (CMMC) Program
Department of Defense Office of the Secretary 32 CFR Part 170

With this final rule, DoD establishes the Cybersecurity Maturity Model Certification (CMMC) Program in order to verify contractors have implemented required security measures necessary to safeguard Federal Contract Information (FCI) and Controlled Unclassified Information (CUI). The mechanisms discussed in this rule will allow the Department to confirm a defense contractor or subcontractor has implemented the security requirements for a specified CMMC level and is maintaining that status (meaning level and assessment type) across the contract period of performance. This rule will be updated as needed, using the appropriate rulemaking process, to address evolving cybersecurity standards, requirements, threats, and other relevant changes. Learn more. https://www.federalregister.gov/documents/2024/10/15/2024-22905/cybersecurity-maturity-model-certification-cmmc-program

Take control of cyber exposure,
before attackers do

Attackers don't honor security silos. Yet the tools we rely on remain fragmented - focused on individual technologies.

We lack the critical attacker's perspective - an interconnected view of viable attack paths, and their potential impact on the organization.

Tenable One is the market-leading Exposure Management platform designed to provide complete visibility into all your assets (cloud, identities, IT, OT, IoT, and applications) and preventable forms of risk (vulnerabilities, misconfigurations, and excess privileges) across the modern attack surface.

Unlike traditional security tools, which lack the attacker's perspective, Tenable One identifies attack paths and toxic combinations of risk across security domains and their potential impact on the things that matter most.

Exposure Management platforms, such as Tenable One, aim to proactively identify toxic combinations of assets and risk that represent true exposure for the business or organization for prioritized remediation – before a breach has even begun or any material impact has occurred.

tenable | Data Sheet

Vulnerability Exposure

A simple, scalable approach to dynamic application security testing

Securing modern web applications is increasingly challenging as developers rapidly build complex apps.

Organizations often release multiple new or updated web applications daily, each potentially containing vulnerabilities. Security teams, outnumbered by developers 100:1, struggle to keep up, often assessing apps too late. Many organizations lack the necessary application security skills and resources to defend against cyber threats effectively.

Another standalone security product isn't the answer. Security leaders need visibility into the security of all their web applications as part of a comprehensive Exposure Management strategy for a complete security and compliance posture.

Unified web app and API scanning that's simple, scalable and automated

Tenable Web App Scanning provides easy-to-use, comprehensive, and automated vulnerability scanning for modern web applications. Configure and manage scans in minutes with minimal tuning. Available as a standalone product or as part of the Tenable One Exposure Management Platform, it offers extensive visibility into your web application security. Choose from SaaS or on-premise options for safe, scalable scanning that covers your entire portfolio. This allows you to quickly and efficiently assess web applications, with high detection rates and minimal false positives, ensuring a clear understanding of cyber risk in your web apps.

Key benefits

Improve scanning confidence
Confidently deliver highly accurate results with minimal false positives and negatives.

Reduce manual work efforts
Save time and effort by using low-touch automated scanning to quickly understand your web application security risks.

Remove security blindspots
Scan your applications, including those built with modern web frameworks like JavaScript, AJAX, HTML5 and Single Page Applications.

Rapid security assessments
Deliver immediate value with fast web application scans that identify common security issues in two minutes or less.

Reduce product sprawl
Gain visibility into your exposure with the Tenable One Exposure Management Platform, reducing complexity and product sprawl.

View identified vulnerabilities to ensure visibility and prioritize your remediation.

Gain	Prioritize	Optimize
Comprehensive visibility	True cyber exposure	Communication of fisk
Get a unified view of all your assets, identities and risk - from vulnerabilities, and misconfigurations, to excess privileges – whether on-prem, across clouds, OT environments and web applications.	Quickly identify and prioritize toxic risk combinations, and leverage detailed attack paths that map asset, identity, and risk relationships to crown jewels to defend the things that matter most.	Provide individual security teams, business leaders, and the board of directors, business-aligned views of cyber risk, with clear KPIs tracking benchmarks against industry peers, ongoing compliance, and risk exposure over time.

Address and manage your cyber risk

Tenable One enables continuous threat exposure management (CTEM) for all of your assets, across the attack surface, so you can make actionable decisions to address them. Measure how effective your security team is at identifying critical flaws and how quickly they remediate cybersecurity risks.

zoom

The biggest roadblocks to workplace collaboration...
and how to overcome them

Collaboration isn't as straightforward as it used to be. With colleagues spread across multiple locations and an increasing number of apps and tools, there's a lot that could be holding your teams back. Take a look at these eye-opening statistics[1] and see how you can help improve collaboration within your organization.

A communications platform for federal, state, and local agencies
Federal, state, and local government organizations can use Zoom or Zoom for Government to evolve public services, improve citizen engagement, and embrace digital transformation.

Secure communications from the start
Our secure government communication platform helps protect the exchange of important government information, all with robust controls necessary for compliance.

A new kind of flexibility
Zoom's flexible architecture is built with your workforce in mind, including strategic solutions that enable government employees to do their best work from anywhere.

Expanding citizen engagement
From video-first public safety services to increased access to justice, our dynamic government communications platform and integrations evolve the way you connect with citizens.

Zoom for Government vs. commercial Zoom
In the United States, we offer a separate platform, called Zoom for Government (ZfG), that is designed to conform with the federal government's security requirements. While originally created for federal agencies, ZfG is also available to U.S. state and local government customers as well as other approved businesses and organizations.

Zoom for Government delivers an intuitive and secure experience similar to commercial Zoom. Both versions of the platform are scalable and flexible, giving today's public sector organizations what they need to achieve their goals while still helping to protect important information.

SOLUTIONS AT A GLANCE
FOCUSED AREA: MULTICLOUD SOLUTIONS

TECBOMO® is a trusted partner in digital transformation, empowering organizations to navigate the complexities of multi-cloud solutions. With our deep understanding of cloud technologies and a commitment to delivering tailored solutions, we assist organizations in making informed decisions about their multi-cloud strategy. Our expertise spans cloud optimization, infrastructure enhancement, and cost reduction. We work closely with our clients, providing ongoing support and guidance throughout the entire project lifecycle.

CLOUD SERVICE STRATEGY

TECBOMO® empowers organizations to fully leverage the advantages of cloud-native environments through tailored solutions and expert guidance. By optimizing IT infrastructure, enhancing agility, and reducing costs, TECBOMO® enables businesses to thrive in the dynamic digital landscape. Our comprehensive approach includes ongoing technical support and streamlined IT procurement processes, ensuring a seamless transition and maximizing the return on investment in cloud-native technologies.

CLOUD DATA MANAGEMENT

TECBOMO® approaches cloud data management solutions with a focus on seamless data flow. We understand that efficient data movement is crucial for modern businesses, and our solutions are designed to optimize this process. By leveraging cutting-edge cloud technologies, we enable secure and reliable data transfer between various sources and destinations. Our tailored solutions ensure that data is readily available for analysis, reporting, and decision-making, empowering businesses to gain valuable insights and drive growth.

CLOUD MANAGEMENT

TECBOMO® empowers organizations to improve their cloud platform solutions by providing standard-based guidance for implementation, management, and optimization. Their expertise enables customers to effectively deploy, manage, analyze, and report on any cloud workloads, ensuring seamless operations and data-driven decision-making. With TECBOMO® 's support, businesses can confidently leverage the full potential of their cloud infrastructure to achieve their strategic objectives.

CLOUD NETWORKING SECURITY

TECBOMO® empowers businesses with cutting-edge cloud networking and security solutions, granting end-users effortless access to cloud and SaaS applications. This seamless connectivity not only boosts productivity but also significantly reduces the financial burden of network operations.

SOLUTIONS AT A GLANCE
FOCUSED AREA: SECURITY TRANSFORMATION

TECBOMO® 's cybersecurity approach centers around zero trust transformation, emphasizing speed to market for security solutions. This involves establishing strategies that prioritize rapid deployment and implementation of security measures. By using an agile methodology this ensures that businesses can quickly adapt to evolving threats and maintain a strong security posture.

SECURITY ARCHITECTURE
TECBOMO® helps customers evaluate security solutions as part of an architecture-driven approach that extracts maximum value, performance, reduces overhead, and improves optimization and integration of security tools.

ENDPOINT SECURITY
TECBOMO® helps customers choose endpoint security solutions that address issue related visibility. TECBOMO® approaches endpoint security solutions by thoroughly understanding the current and emerging threat landscape and developing strategies that function within an organization's broader security posture.

NEXTGEN FIREWALL
TECBOMO® 's team apply a consultative approach to develop strategic plans for the next-gen firewall project that establishes awareness, optimize defense capabilities, improve threat response, mitigate breaches and close compliance gaps.

IDENTITY ACCESS MANAGEMENT
TECBOMO® helps customers ensure authorized people and devices have the appropriate IAM solutions to ensure secure access. These solutions cover Lifecycle Management, Network Access Controls (NAC), Single Sign-On (SSO), Privileged Access Management (PAM) Multi-factor Authentication (MFA), Key Management and Encryption.
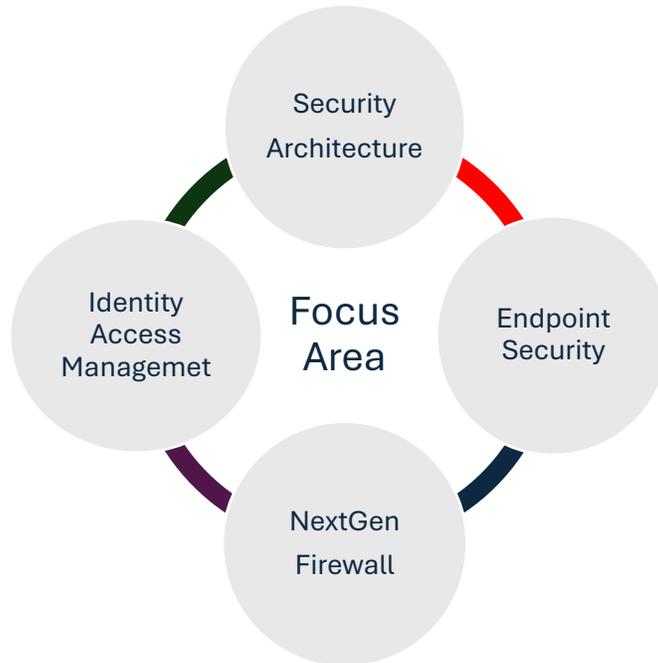

SOLUTIONS AT A GLANCE
FOCUSED AREA: DIGITAL STRATEGY

Today, innovative applications, services and solutions are enhancing and transforming customer and employee experiences. TECBOMO® 's Digital Consulting provides implementation, ongoing support and services to help organization customers navigate their digital transformation journey.

DIGITAL BUSINESS CONSULTING
TECBOMO® consultative approach assists businesses in developing an IT and data strategy that produces actionable solution selection that drives business decisions and create better organizational outcomes.

CUSTOMER EXPERIENCE
TECBOMO® empowers businesses to deliver exceptional customer experiences by leveraging cutting-edge technology solutions. We craft tailored strategies that seamlessly integrate technology to enhance every customer touchpoint, from initial engagement to ongoing support. Our approach focuses on understanding your unique customer journey, identifying opportunities for improvement, and implementing solutions that drive customer satisfaction, loyalty, and ultimately, business growth.

DATA ANALYTICS & AI
TECBOMO® empowers customers by providing cutting-edge data analytics and AI technologies. These tools enable businesses to accelerate their operations, gain valuable insights from their data, and ultimately achieve their business outcomes. TECBOMO® 's solutions help bridge the gap between IT and business needs, ensuring that technology investments translate into tangible results.

INTERNET OF THINGS
TECBOMO® takes a holistic approach to IoT consultancy, working with customers to jointly define desired outcomes. TECBOMO® collaborates with our customers to design, build and ultimately implement, migrate and deploy IoT solutions.
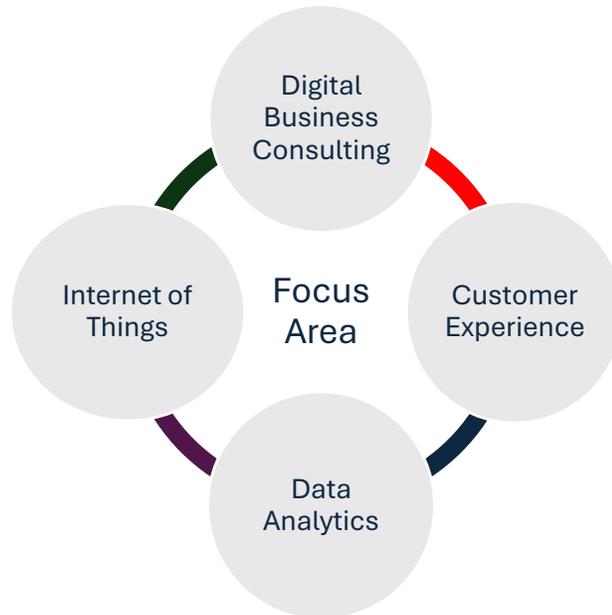

# SOLUTIONS AT A GLANCE
FOCUSED AREA: AI SOLUTIONS

In today's rapidly evolving digital landscape, Artificial Intelligence (AI) has emerged as a transformative force, revolutionizing industries and reshaping the way businesses operate. AI-powered solutions are no longer a futuristic concept but a present-day necessity for organizations seeking to gain a competitive edge. TECBOMO® recognizes the immense potential of AI and is committed to empowering businesses to harness its power through best-in-class AI solutions.

Artificial Intelligence at its Core
AI, at its core, is about empowering machines to mimic human intelligence, from learning and problem-solving to perception and language understanding. TECBOMO® recognizes the transformative power of AI and is committed to staying ahead of the curve. By leveraging cutting-edge research and development, TECBOMO® delivers innovative AI solutions that address real-world challenges, optimize processes, and unlock new possibilities for businesses across industries.

AI Consulting & Training
TECBOMO® is committed to staying at the forefront of AI innovation. Our recent participation in the AI Proving Ground expertise training, offered by our trusted training partner World Wide Technology, has further solidified our capabilities. This comprehensive program has equipped our team with the latest insights and practical skills to guide organizations through their AI journey. We can now offer even more robust support, from strategy development and infrastructure optimization to model deployment and ongoing management. By leveraging our deep understanding of AI technologies and real-world applications, we empower businesses to unlock the full potential of AI and drive sustainable growth.
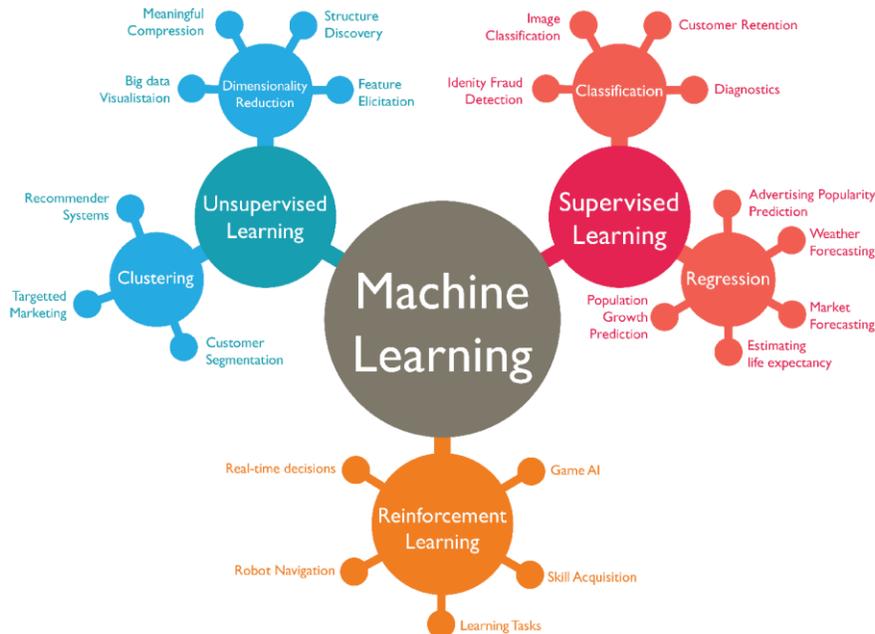

Simplifying Your Technology Purchases with TECBOMO™

In today's fast-paced digital landscape, acquiring the right technology can be an overwhelming and complex endeavor. From navigating countless product options and technical specifications to managing vendor relationships and budget constraints, the process often consumes valuable time and resources.

This is where TECBOMO® steps in. By leveraging our expertise in technology procurement and supply chain management, TECBOMO® effectively streamlines these intricate processes, offering a centralized and simplified approach to your technology investments. We handle the complexities, allowing your organization to benefit from efficient, cost-effective, and strategic technology acquisitions, ultimately freeing up your team to focus on core business objectives and innovation.
